II. MEOPTA

50X1-HUM

Meopta, the precision-instrument and optical factory in Frerov, now employs about 1,600 persons. Monthly production is 15 million /crowns worth?7, and most of it is for export. The factory's present production is almost exclusively civilian goods. Its production program is about as follows:

- 1. Cameras
 - a. Optiflex, semisutomatic reflex, 6 x 6
 - b. Opima, 24 x 36 mm, for moving-picture film, something like a Leica
 - c. Mikroma, 10 x 14 mm, for 16-mm moving-picture film
 - d. Magnola, 18 x 24 cm, for professional photography
- 2. Projection Equipment
 - a. Sound projector for 16-mm film, for professional use
 - b. Same, for amateurs
 - c. Silent projector, for 8-mm film, for amateurs
 - d. Projector (magic lantern) for 4 x 4 lantern slides
 - e. Photographic enlarging equipment, 6 x 6, 6 x 9, 18 x 24
- 3. Observation Equipment
 - a. Field glasses: 4 x 15 opera glasses
 - 4 x 20
 - 6 x 30 standard
 - 6 x 30 military binoculars (for export to Argentina)
 - b. Magnifying glasses
 - c. Microscopes
- 4. Aiming Devices
 - a. Gun sights for hunting rifles, 4 x 30
- 5. Repairs on Military Equipment
 - Repairs on 200 stereoscopic telemeters, one-meter base (German Stereo EM's)

The plan calls for the manufacture of five prototypes of scissors telemeters. These are something new. The Germans made similar equipment at the end of the war, but only a few of them.

In June 1949, parts for the R-program (i.e., Soviet) periscopes were completed. The periscopes were produced only in the form of unassembled parts. During their production and after their completion, very strict security was observed, and all the plans and other documents were guarded by the management of the enterprise. It is impossible to obtain any but oral information concerning methods and quantities.

III. SIGMA NATIONAL ENTERPRISE IN OLOMOUC

The former manager of the entire combine, Engineer Malik, has been discharged because of political unreliability and indifference to the party. Malik was replaced by V. Grubner, former manager of the Kunc branch factory in Hranice.

Personnel Director Danek has been relieved and replaced by a helper, Podi-

Sales Manager Sedlacek, who was a Social Democrat before the merger of the parties, also has been removed and replaced by L. Handl.

vinski, whom I know to have difficulty in writing his own name.

The manager of the financial and economic-investment section, /another?7 Sedlacek, has been replaced by 31-year-old Ant. Kajnar. This section controls the entire financial and economic business of the enterprise.

Antos, chairman of the Enterprise Council, was obliged to leave the enterprise because of differences of opinion on internal party matters between him and the party leadership in Olomouc. The Enterprise Council was dissolved. As it did not prove its value, it will not be reconstituted.

The Sigma National Enterprise in Olomouc has the following subsidiaries:

Chema, in Lutin, which produces heavy industrial pumps, other pumps, and sprayers for the following:

- 1 State machine stations (not for delivery to private farmers): plant sprayers, trade-marked Fenomen and Autofenomen (motor-driven).
- 2. Ministry of Agriculture (not to be delivered to private farmers): manure spreaders. Farmers who are regular members of cooperatives may apply for them, but the Ministry of Agriculture allocates them.
- 3. Ministry of National Defense: oscillating pumps and gasoline pumps for automobiles and aircraft; plastics and chemicals. Now only bakelite [is produced? The factory was established during the war to produce war material, gas, gas masks, and decontamination equipment. The factory has a foundry for nonferrous metals which now operates only for Sigma.

Kosmos, Olomouc, manufactures mechanical pumps and drills. It has a large foundry which also works on orders for other enterprises.

Kunc, in Hranice, manufactures industrial instruments and manual pumps.

Vitez, in Frerov, manufactures auxiliary pumps.

Cihelka*, in Haj near Opava, manufactures manual pumps.

Adlo*, in Cadca (Slovakia), manufactures insecticides and centrifugal pumps.

Tatzel, in Opava, manufactures pumps and air pumps for mines.

Hoenig, in Hodonin, manufactures inductrial equipment, such as valves, faucets, etc.

Hercik & Neugebauer, in Brno, manufactures equipment for fire engines.

Holman & Jerabek, in Plzen, and Ing. Maticka, in Prague, manufacture centrifugal pumps.

Rourovna Pisek (Pisek Pipe), in Pisek, produces mechanical pumps and waste pipes.

Chvojka*, in Prelouc, manufactures watering systems for livestock.

Titan, in Prague - Strasnice foroduct not given 7.

Gloria, in Frydlant product not given .

Stratinek, in Vysoke Myto [product not given].

Smekal, in Slatinany, manufactures fire engines.

Katschner, in Police, produces ironware and drills.

*Until 1 January 1950, the factory was operated by its original owner, but since then, he has not even had access to the factory. After the war, the production of cartridges in the Chema Factory in Lutin was stopped and the equipment partly dismantled; however, it is still available in the enterprise.
